Inception date	2 March 2017
Risk profile	High
Fund auditors	Ernst & Young Incorporated
Fund trustees	Northern Trust
Distributions	Accumulation Class

## Portfolio Description

The primary objective of the portfolio is to achieve long term capital appreciation by investing in a concentrated portfolio of global equities. The portfolio manager acquires global equities at levels below the assessment of the companies' fair values. The portfolio manager also takes cognisance of global economic, sector and investment trends to tilt the portfolio towards attractive regions, sectors, and companies. The Integrity Global Equity Fund is required to invest a minimum of 80% of the portfolio in equities and is therefore suitable for investors with an investment horizon of five years or longer.

Integrity diligently follows a value investment philosophy and process. This is the same investment philosophy and process applied in managing the Integrity Global Equity Strategy, with track record since 11 September 2012.

The portfolio has adhered to its policy objective since its inception.

## Performance History

Illustrative Performance - Growth (net of fees) of USD100 invested at inception.

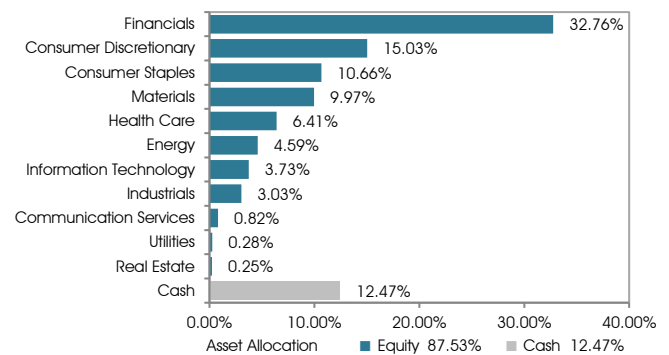

\*The illustrative investment performance which is shown is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

## Top Ten Holdings

3 Month	9.68%	4.57%
1 Month	4.80%	2.67%
Highest annual return	46.23%	54.60%
Lowest annual return	-16.97%	-11.26%

## Regional Allocation

# Integrity Global Equity Fund

Minimum Disclosure Document &  
General Investor Report - March 2021

## Relative performance

Over the quarter, the fund achieved a net return of 9.68% compared to the benchmark of 4.57%. A large portion of this alpha was generated by Daimler AG (1.51%), Société Générale SA (1.25%), and Capital One Financial Corp (1.19%). This relative outperformance was particularly pleasing considering the relentless headwinds the value style has had to endure since the launch of the fund. With the likelihood of increasing global bond yields, as well as the emergence of a new bull market in commodities, amongst other tailwinds, makes us believe that the nascent outperformance of value over growth still has years to run.

## Fund composition

The fund's composition changed markedly during the quarter: The fund sold out of the general Japanese exposure (gained through the iShares MSCI Japan ETF) to acquire direct exposure to Honda Motor Co Ltd and Sumitomo Mitsui Financial Group. Exposure to the Information Technology sector was reduced through the sale of Cisco, Oracle, and Samsung as these companies all approached the Investment Manager's estimates of fair value. The fund diversified its US banking exposure by adding Bank of New York Mellon and Capital One, while reducing exposure to Bank of America and Citigroup. At the beginning of the quarter the fund increased its exposure to the MSCI All-Country World Value index (gained via the iShares Edge MSCI World Value Factor ETF) in order to boost beta to broad value. However, over the subsequent three months, this exposure was reduced to acquire or increase exposure to specific value opportunities. These include Intel, Royal Dutch Shell, Daimler AG, CK Hutchinson, Brilliance China Automotive and Anglo American. The fund further increased exposure to gold through additional purchases of AngloGold Ashanti and Barrick Gold. The fund maintained exposure to the Healthcare sector after divesting from Johnson & Johnson and acquiring Bristol-Myers Squibb. Finally, the fund reduced exposure to British American Tobacco and invested into Imperial Brands. Positions that reached fair value and have not been replaced by comparable holdings include Tapestry, Proctor & Gamble, and Occidental Petroleum.

Asset Allocation	2021/03/31	2020/12/31
Cash	12.47%	6.32%
Equities	87.53%	93.68%
Total	100.00%	100.00%

## Glossary

**Annualised performance:** Annualised performance shows longer-term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

**Highest & Lowest return:** The highest and lowest returns for any 1 year over the period since inception have been shown.

**NAV:** The Net Asset Value represents the assets of a Fund less its liabilities.

## Disclaimer

The Integrity Global Equity Fund is a sub fund of the Prescient Global Funds plc, an open-ended umbrella type investment company, with segregated liability between its sub funds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Communities (UCITS) Regulation, 2011 as amended (the Regulations). It is managed by Prescient Fund Services (Ireland) Limited at 49 Upper Mount Street, Dublin 2, Ireland which is authorised by the Central Bank of Ireland, as a UCITS IV Management Company. The Prescient Global Funds plc full prospectus and the Fund's KIID are available free of charge from the Manager or by visiting [www.prescient.ie](http://www.prescient.ie). The Manager retains full legal responsibility for any third party named portfolio.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period, TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets.

Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Fund Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

### Risks

Developing Market risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
